

About the Authors

The Computer Science Principles curriculum from Code.org was written by a team of five distinguished CS educators with a variety of educational experiences and expertise.

Rebecca Dovi

Rebecca is the Chief Educational Officer for CodeVA, a non-profit dedicated to bringing computer science to children across the state of Virginia. During her 17 years teaching high school CS, she piloted the new CS Principles course. She is also the instructor for the new AP Computer Science MOOC. In Virginia, Rebecca serves as the founding president of the CSTA - Central Virginia Chapter and represents Virginia nationally in the CSTA Leadership Cohort.

Baker Franke

Baker is the K-12 Curriculum Development Manager for Code.org. Until just recently, he was a high school teacher and department chair at the University of Chicago Laboratory Schools where he taught introductory, AP, and advanced computer science courses. Baker believes fervently that CS should be considered a core subject in K-12 and should become part of the canon of American education.

Andy Kuemmel

Andy is the founding president of the Wisconsin-Dairyland Chapter of the CSTA. He teaches CS Principles at Madison West High School in Madison, Wisconsin, and also at the University of Wisconsin-Madison. Andy has over 20 years of experience providing professional development to teachers.

Brook Osborne

Brook is the High School Program Manager at Code.org, a role in which she develops curriculum and professional development for educators. Previously, she was the Director of Outreach for the Computer Science Department at Duke University, where she taught courses and worked with educators and administrators in both formal and informal CS education. She also served as the Pilot and Outreach Coordinator on the CS Principles project working with project leadership and pilot teachers.

Pat Phillips

Pat serves as a special project manager with Code.org on the CS Principles curriculum project and created the Mobilize Prime teaching and professional development resources for the Exploring CS curriculum. She taught CS for 20 years in Janesville, Wisconsin, and currently serves as the Editor of the CSTA Voice and works as an educational consultant.
