

## Lesson 3 - Student Activity #1 Guide

### Adding a Predator

Use the instructions below to add a new breed:

	<p>Use the Edit Breeds button in the Spaceland area to create a new breed.</p>
	<p>Click on “Add Breed” to add a new breed.</p>
	<p>In the “New Breed” dialog box, give the breed a name and press OK.</p>
	<p>You will see the Breed on the next panel. (We added the breed called “Mountain Lion.”)</p> <p>Next, click Edit Traits next to the new breed label for “Mountain Lion.”</p>
	<p>Create a new trait (or variable) for the Mountain Lion breed called “Pred-energy.”</p>
	<p>The set my (trait) to (value) block is used to set an agent’s trait to some value. In this case, the Mountain Lion’s Pred-energy is being initialized.</p>
