onscreen? (word problem)

Code.org Computer Science in Algebra

C O
D E

Description: Write a function **onscreen?**, which takes in a character's x-coordinate and checks to see if it is safe on the left and on the right.

Contract and Purpose Statement

Every contract has three parts...

_____ : _____ -> _____
     function name   domain   range

_____
what does the function do?

Examples

Write some examples for your function in action...

Example: _____ (_____) = _____
             function name   input(s)   what the function produces

Example: _____ (_____) = _____
             function name   input(s)   what the function produces

Definition

Write the definition, giving variable names to all your input values

Define: _____ (_____) =
          function name   variables

_____
what the function does with those variables
